

Measuring and Labeling Leaves

Buds, Leaves and Global Warming Protocol

Harvard Forest Schoolyard Ecology

By Lise Letellier

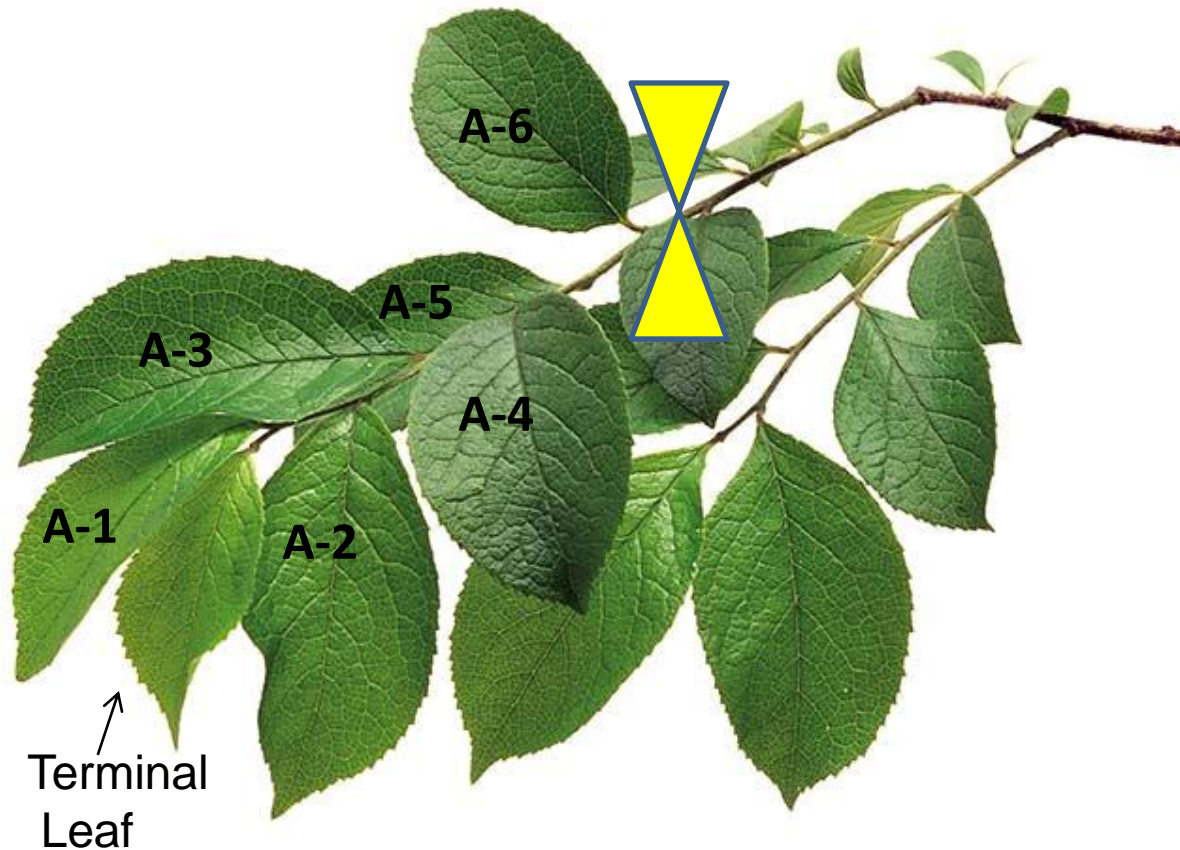

Holyoke Catholic High School

Measure width of the leaf at its widest point.

Measure the length of the leaf blade, not including the leaf stem (petiole).

Placing the label and counting leaves

AFA-IC-13403 [RM] © www.visualphotos.com

Reminder that we do not count the leaf closest to the terminal bud (tip of main branch) as one of our study leaves.
