

- Conant plots are located just outside the biometry plots at a 90° angle from the direction of the transect, on the south side of it (on the left side of the transect, when moving away from the EMS tower), except for plot H1 which is located at 90° on the north side of the transect (otherwise it would have ended up in the middle of the road). Subplot 1 is located 35ft from the center of the biometry plot. In the field, a white PVC pipe with aluminum tag identifies the subplot P1 corner of the plots.
