Data File:

Name = hf445-01-microbial-sampling.csv

Description = microbial sampling data

Rows = 17 Columns = 9

MD5 checksum = 64e48b0e497962fe7d6ce7d72856cdb8

Variables:

sampling_date = date of sample collection from pitchers

sampling_year = year of sample collection from pitchers

sampling_day = day of sample collection from pitchers (nominalDay)

colonies = number of colonies isolated from each sample
(dimensionless)

colonies_identified = number of colonies from each sample for which
the Internal Transcribed Spacer (ITS) region of ribosomal RNA-coding
DNA was sequenced (dimensionless)
